FINANCIAL SERVICES FIRMS NEED HIGH PERFORMANCE, DEPENDABLE INTERNET SERVICES SO THEY CAN CONDUCT BUSINESS WITH CLIENTS AND TRADING PARTNERS EFFICIENTLY AND SAFELY.

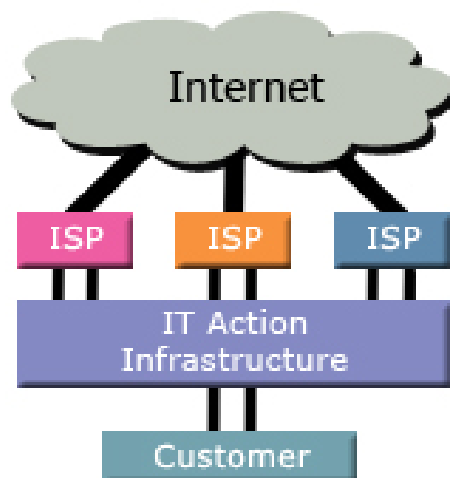

IT Action has developed a complete range of internet services that deliver the ultimate in reliable internet connectivity, whatever your bandwidth requirements, now and into the future.

Our internet services are proactively managed and monitored to provide high levels of continuous availability. To make your connection safe we provide multiple levels of security, from intrusion detection to multi-tiered firewall management and protection against denial-of-service attacks.

MANAGED INTERNET SERVICE

We know that connectivity is often the single point of failure for many critical IT systems.

To solve this problem, we have partnered with multiple Tier 1 Internet Service Providers (ISP) to provide a unique managed internet service that gives you access to the resources of multiple ISPs simultaneously. This guarantees high availability and uninterrupted service for your business and your clients.

KEY OFFERINGS FROM IT ACTION'S INTERNET SERVICES ARE:

TIER 1 POP FACILITIES

IT Action's Point Of Presence (POP) facilities feature the very latest carrier class infrastructure, including multiple levels of 24x7 security, stable high-capacity power supplies, fire protection, in-house support and environmental controls.

HIGH AVAILABILITY

IT Action's high availability managed internet service provides guaranteed uninterrupted service from multiple Tier 1 internet backbones.

MANAGED SECURITY

A broad range of security services, including intrusion detection, managed firewall services, and protection against denial-of-service attacks.

DOMAIN NAME MANAGEMENT

IT Action is a tag holding member of **Nominet**, the internet registry for .uk domain names. We can handle all of your domain name management, from registration to routing and configuration.

24x7x365 PERFORMANCE MONITORING

Monitoring of internet service performance and availability using IT Action's automated monitoring and alerting system.

REMOTE OFFSITE BACKUP

The communications infrastructure supporting IT Action's high availability internet services is a key component of our flexible Disaster Recovery solutions. It enables us to deliver remote offsite backup solutions quickly and easily.

VPN SERVICES

For secure remote connections we can configure and manage single link virtual private networks (VPN) or load balanced VPNs for more resilience.

Whatever your requirement for internet services, IT Action simplifies the procurement of your internet services, so you receive the right level of performance and security as cost effectively as possible.
